

Better Interiors- July 2018

Fashionable carpets, shimmering surfaces and more...

MAGARI

The Concrete Table collection by Magari is in association with artist Ashu Gupta, an artist who uses pen and ink as a medium of design. The series showcases the inherent nature of how concrete develops its own characteristic texture creating unique patterns which is open to interpretation—and here it is depicted as the surface of the moon. Ashu identifies pen as her strength and she enjoys doodling and drawing on new surfaces like wood, ceramic, canvas, etc. Her style is based on creating small connected circles which eventually combine to form patterns. The new collection (read, the table top) is designed and created by Magari which forms the base for the paintings. All the water-proof artwork is handmade, and the variation of the colour of pigmented concrete top makes each piece unique. The base is made of circular solid metal sections with brass finish. Luna, the pink coloured table is the highlight of the entire series and is inspired by the lunar eclipse. The tables have all the phases of the moon covered in the form of nesting tables, side tables and center tables. Prices start from ₹ 30,975 and go upto ₹ 63,875.

FANUSTA

The brand recently introduced The Mini Trails, a series of paintings influenced by traditional Udaipur miniature paintings which are small-sized handmade mural-like depiction of incidents from Rajput and Mughal history. Drawn on paper or sometimes ivory, the miniatures are painted utilizing extremely fine brushes, the result of which is exceptionally intricate work of hand. Earlier done in natural colours, the paintings are today made utilizing watercolours but the technique still remains intact and has been passed down through several generations. Artist Puran Sharma, belonging to a lineage of traditional miniature painting artisan family, has handcrafted these exquisite and detailed pieces of artistry. Prices start from ₹ 1,200 and goes upto ₹ 5,000.

VENTURA INTERNATIONAL

A leader in luxury wall surfaces, Ventura International recently introduced a unique and dramatic range of three-dimensional decorative wall paneling—Mabel—from Turkey-based company 3d Wall. Made from light, strong and durable copolymers, the series contains small polygonal tiles which can be used in opposing directions to create subtle geometric stripes which result in visually-stunning walls. The design of the tiles give a sense of depth to the wall by playing with the lights and shadows created by Mabel's polygonal geometry. This surface-based experimental design approach can be applied to a wide variety of contexts in interior design. Shape of the tile creates an illusion of colour shades through the natural reflection of lights. The collection is available in gold, silver, white, smoke, anthracite and black hues.
